

Schedule Management System

A platform is to be created: teacher ,student and admin will be the users.

- Student can see teachers information,exam routine and class routine.
- In this application, every student who registers will receive email notifications for their class times 30 minutes before each class and exam begins.
- The students who register for a particular semester will only be able to view the schedule for that specific semester.
- Teacher will see how many student register .
- Teacher can add their own information.
- Teachers also can see the exam and class schedule.
- Notification will be sent to the teacher's email 30 minutes before the start of the class and exam
- The teacher who is enrolled in a particular course will only be able to view the schedule for those specific courses.

-And all access will be available to the admin.

-The admin will upload the schedule.
